

Automobili Lamborghini receives the ESG Recognition from DNV

An achievement that establishes the Sant'Agata Bolognese-based company as a leading player in the automotive sector for its structured approach to sustainability.

Sant'Agata Bolognese, 13 May 2026 – Automobili Lamborghini announces it has received the ESG Recognition from DNV—a leading global certification body—which is awarded to companies that adopt certified management systems in support of their commitment across the three Environmental, Social, and Governance dimensions. For the House of Sant'Agata Bolognese, this achievement underscores a distinctive commitment in the sector, highlighting a journey founded on international standards and on a comprehensive system of certifications that governs key areas such as environment, health and safety, quality, information security, and privacy.

DNV's ESG Recognition confirms that a company uses certified management systems to support its ESG practices. It is not an assessment of performance against a specific model or set of metrics, but rather the recognition of a structured approach, based on international standards and on the continuous improvement of business processes.

The official presentation of the recognition took place at the Automobili Lamborghini headquarters in Sant'Agata Bolognese, in the presence of DNV representatives and the company's management.

"Achieving DNV's ESG Recognition highlights a journey built over time through international standards, specialized expertise, and management systems integrated into business processes. For Automobili Lamborghini, this achievement confirms the commitment to translate ESG principles into concrete and verifiable practices, consistent with the company's strategy," said Ranieri Niccoli, Chief Manufacturing Officer of Automobili Lamborghini.

Barbara Frencia, CEO of Business Assurance at DNV, adds: *"In a complex landscape such as ESG, leadership is recognized by the ability to translate principles into action. With the ESG Recognition, we are not expressing an opinion but confirming the fact that Automobili Lamborghini has implemented a certifiable approach in support of its sustainability strategy. Having multiple management systems certified to recognized standards, support company commitments in each of the E, S, and G dimensions and demonstrates to stakeholders how these are systematically translated into measurable operational performance."*

Underpinning the recognition are certifications to a main standard within each of the three ESG dimensions. Within environment, the ISO 14001 certification attests to the adoption of a structured environmental management system, focused on the control and continuous improvement of environmental performance. ISO 45001 confirms the company's commitment to occupational health and safety management, through processes and tools dedicated to safeguard people and promote a safe working environment. For Governance,

Media Information

ISO 9001 certifies Automobili Lamborghini's Quality Management System, which governs and improves business processes as well as the organization, documentation, and resources that regulate quality-related activities.

These are accompanied by additional certifications that expand the scope of the recognition and reinforce Automobili Lamborghini's governance on ESG issues, from ISO 50001 for the energy management system to EMAS for the Eco-Management and Audit Scheme. All management systems and certifications are managed by an Automobili Lamborghini cross-functional team with a process perspective, in support of continuous improvement and compliance with the reference standard.

The House of Sant'Agata Bolognese has also renewed its company-wide certifications for ISO/IEC 27001 for Information Security and ISO/IEC 27701 for the Personal Information Management System. Extending to the entire business lifecycle, from design and production to after-sales, these certifications confirm the robustness of the processes adopted for information security management and personal data protection, safeguarding corporate know-how and heritage, as well as the privacy of customers and employees.

The ESG recognition from DNV reflects the structured approach to governance over key areas that Automobili Lamborghini has adopted, from the management of environmental impacts to the health and safety of people, from process quality to information security and personal data protection.

For Automobili Lamborghini, this achievement confirms the centrality of sustainability issues in the company's vision and reinforces the journey undertaken by the company in integrating these principles into its processes and operational standards.
